SUMMARY

Full Stack Developer with hands-on experience in FastAPI, React.js, Node.js, PostgreSQL, MongoDB, and Docker. Built real-time applications, AI-powered platforms, and scalable REST APIs through multiple software development internships. Strong foundation in backend development, database design, authentication, and system architecture.

EXPERIENCE

Web Development Intern

Versaero Private Limited

March 2025 - June 2025, Remote

- Contributed to a Real-Time Voice Translator desktop application, implementing frontend components and backend API integrations across the product lifecycle.
- Participated in feature implementation, debugging, and functional testing cycles in a startup product environment.
- Collaborated cross-functionally to improve application usability and streamline deployment workflows.

Python Developer Intern

Programmica

December 2024 - February 2025, Remote

- Built Python modules and automation utilities integrating third-party APIs, reducing manual business logic overhead.
- Resolved software defects and improved system reliability using Git-based collaborative development workflows.
- Implemented backend business logic for data processing pipelines and RESTful service integrations.

Full-Stack Web Development Intern

K2 Edtech

June 2024 - October 2024, New Delhi, India

- Developed responsive web applications using React.js, Node.js, and Express.js; implemented WebSocket-based real-time communication features improving live collaboration functionality.
- Built and maintained CMS functionality, optimized page load performance through bottleneck analysis and navigation improvements.
- Covered the full development loop: frontend, backend, unit/integration testing with Jest, and deployment tasks.

PROJECT

ARA — AI Resource Assistant Platform

github.com/AngulaBadrinath/ARA

- FastAPI | PostgreSQL | Docker | JWT Authentication
- Designed and developed a scalable AI-powered resource management platform enabling intelligent resource discovery and workflow organization.
- Architected a modular FastAPI backend with JWT-based authentication, role-based access control, and RESTful API architecture.
- Designed PostgreSQL database schemas with optimized relational modeling for efficient data retrieval and scalability.
- Containerized the application using Docker and Docker Compose, enabling reproducible multi-environment deployments.
- Implemented environment-based configuration management and modular service separation to support future microservice migration.

Real-Time Voice Translator

github.com/AngulaBadrinath/RealTime-VoiceTranslator

- Python | Speech Recognition | Translation APIs
- Built a desktop application capable of translating spoken language between multiple languages in real time.
- Integrated speech recognition and translation services into a single workflow.
- Focused on reducing translation latency and improving conversational usability.

Real-Time Data Visualization Dashboard

github.com/AngulaBadrinath/RealTime_SampleData-amazon

- Vue.js | D3.js
- Created dashboards for visualizing continuously updating data streams.
- Optimized rendering performance for large and frequently updated datasets.

EDUCATION

B.Tech — Automation & Robotics Engineering

Guru Gobind Singh Indraprastha University (GGSIPU) • New Delhi • 2026

CERTIFICATIONS

Introduction to Back-End Development

Meta

Introduction to Front-End Development

Meta

Programming with JavaScript

Meta

Version Control

Meta

Web Development Internship Certificate

K2 Edtech

Deloitte Data Analytics Job Simulation

Forage • 2026

SKILLS

Languages: Python, JavaScript, TypeScript, C++, SQL

Frontend: React.js, Next.js, Vue.js, Tailwind CSS, HTML5, CSS3

Backend: FastAPI, Node.js, Express.js, REST APIs.

Databases: PostgreSQL, MongoDB

Tools & Infra: Docker, Docker Compose, Git, GitHub, Postman

Core Concepts: Authentication & Authorization, JWT, API Design, Database Modeling, OOP, System Design, Real-Time Systems, Containerization, SDLC
